

WE OFFER DEDICATED **REMOTE DEVELOPERS**

We can provide you with qualified remote developers that you can seamlessly hire without worrying about management or overheads like managing payroll, benefits, and other amenities.

We can supply a university-trained developer/s within 24 hours, who has ample experience in your area of expertise that can identify and solve issues that you are facing.

Our developers have good communication skills and can work independently and easily blend into your organization and team, which makes them feel like your own employees. For the highest quality remote developers, you pay a fraction of the hourly rate you would pay in your country, without start-up costs or high brokerage costs.

We also offer the opportunity to participate in our sustainable business program for various charities.

Your development team

Our developers will get to work for you from the get-go. Everything is done in-house, such as job interviews, matching interviews, and training. That way, we can guarantee you high quality while ensuring the recognized global standards.

10+

Years of Experience in the Industry

98K+

Technical Specialists Available

49+

Satisfied Clients across the Globe

WE OFFER

TECHNOLOGY

We build teams with experience in almost any desired technique.

Our developers work according to Dutch standards and are familiar with all common frameworks.

We like to think along about specific wishes in terms of skills or background.

C/C++

HOW DO WE WORK?

We work together with university-trained and experienced software developers who deliver work according to Dutch standards. Our network consists of developers with experience in almost all common techniques and frameworks. They are happy to work for you full-time!

Application

We come up with a proposal of 1-3 candidates and give you the opportunity to get in touch with these candidates so that you can make a good choice

We will look for you

We will call you to discuss your application. Then we will immediately get started free of charge to look within our candidates and our network

Developer offer

We come up with a proposal of 1-3 candidates and give you the opportunity to get in touch with these candidates so that you can make a good choice

Evaluation

We have a monthly evaluation to make sure everything is going satisfactorily.
